DOORS AND WINDOWS

THE
HOME
COLLECTION

The Origin Home Collection...

The Origin Home Collection is a suite of the finest quality products, designed and manufactured in Great Britain, by us.

This includes our award-winning:

- External Doors
- Internal Doors
- Entrance Doors
- Sliding Doors
- Windows

This ensures that we have an aluminium architectural solution for every home, whether it be new build or renovation.

British Manufactured

Here at Origin, we're proud to say that all of our products are exclusively designed and manufactured in our Buckinghamshire based factory.

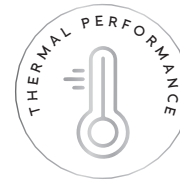

We strive to manufacture the highest quality doors and windows, so we make sure that we have full traceability of the product's journey. By looking after the entire lifecycle – from sourcing all the way through to delivery – it means that we have the greatest level of control in the overall quality.

Built to Last

Our in-house Research and Development team works tirelessly to ensure our products meet the demands of the UK market, optimising weather rating, security and aesthetic appeal. We make sure that innovation has been engineered at every level.

Our uncompromising quality control, finely tuned components, precision engineering and exceptional craftsmanship all combine to enable us to offer a guarantee of up to 20-years for complete peace of mind.*

Thermally Efficient

For year-round efficiency, our doors and windows are designed to ensure too much heat doesn't enter the home during the summer months and that the heat won't escape in the winter. In real terms, this will help reduce your energy bills and will make your room usable all year round.

All our products meet or exceed building thermal requirements, with U-Values as low as 0.78W/m²K.

**Guarantee based on where the products are installed.*

Safe and Secure

Safety is a design priority for our in-house Research and Development team during the creation of any new product, and we're proud to say that our products are not only PAS 24 compliant, but can also be Secured by Design accredited too.*

This means that our products have been thoroughly examined and tested to make sure they're fit for purpose in any property, whether that's in an existing structure, renovation or new build.

Premium Grade Aluminium

Aluminium weighs 67% less than steel yet carries a lot of its strength properties. This means that it can create lighter and easier to operate doors and windows. Aluminium allows for slim sightlines to be achieved for maximised views and can be made in complex configurations (such as corner bi-folds) without compromising on performance or security.

The very nature of our products demands precision driven design and engineering – something that materials such as timber and uPVC just can't measure up to, as they won't maintain alignment over the lifetime of the product.

**Some systems are not PAS 24 or Secured by Design compliant. Please refer to the individual specification of products to check.*

Unbeatable Lead Times

At Origin, we understand that if you're doing a building project, doors and windows are probably some of the last things to be ordered as you'd be waiting on set aperture sizes before being able to proceed.

We have re-written the rules for manufacturing. Using innovation, investment, an expert production team and advanced machinery, we have made it possible for you to specify when you want your goods delivered. Whether that's in a day, a week or a month's time, it's Your Lead Time, Not Ours. Most popular colours are available in as little as 24-hours.**

Bespoke to You

All Origin products are completely bespoke and tailored to your requirements, so you can personalise your Origin products as you wish.

There will be customisable elements unique to each product, including overall size, configuration as well as handle options, of which can match or contrast the door or window colour. So, whatever product you opt for, you're able to create a door and window as unique as you.

Pick Your Colour

One of the bespoke elements of Origin Doors and Windows is of course the vast array of colour options that are available to you. We're pleased to be able to offer over 150 different RAL colours for you to choose from.

The extensive level of personalisation goes beyond just choosing from a RAL colour. You can also specify it in a satin, matt or gloss finish. From there, textured finishes are also available, so you can create your look and feel, just as you like it.

Our mission of operational excellence and flawless product quality wouldn't be complete without us looking after powder coating. That's why we invested in our own powder coating facility that takes it to a new level.

***Products within the Collection may operate on different lead times. Please refer to our website for the most up to date lead times. Furthermore, the lead time shown may not fit in with your chosen installer's availability.*

The Door Collection

Pick your aesthetic...

The Origin Bi-fold, French and Single door can be specified in three different sightlines, across two distinct styles.

The new Origin OB-36* offers ultra-slim sightlines and unparalleled thermal efficiency. This means less profile and more glass is achieved. It invites in more natural light and maximises the view of your surroundings. Available in two styles – the Soho design features steel-look glazing bars, whilst the Contemporary offers a sleek uninterrupted solution.

Also available in the Contemporary aesthetic is the OB-49 and OB-72. With a slightly wider sightline, these can provide a more traditional finish.

All are manufactured using a premium grade aluminium, so can accommodate complex layouts such as corner bi-fold set ups.

Configurations to suit your home...

Ranging from one through to twelve-door sets, and with bi-folds, corner bi-folds, French and single doors available, we guarantee there is a configuration to suit any home.

Exclusive hardware options...

With a diverse and stunning range of hardware and handle options, our exclusive suite of accessories can be specified to match or contrast to the colour of the frames. The gasket colour is also your choice, making it easy to create your own unique look.

Unbeatable lead times...

Thanks to our unique manufacturing techniques, your door's delivery date can be specified at the point of ordering, so the manufacturing schedule is controlled by your requirements.

Keeping the family safe...

Safety and security is a design priority for Origin. Finger-safe gaskets, low thresholds options to minimise trip hazards, 3-star cylinder barrels which are anti-snapping, drilling and picking, and magnetic keeps to temporarily hold the doors in place whilst you operate them are all available.

Thermally efficient...

The Origin Bi-fold Door has been cleverly designed to keep you warm when it's chilly and cool when it's hot. With certified U-Values of 0.78 W/m²K for the OB-36⁺ and 1.1 for both the OB-49 and the OB-72, they all comfortably outperform British Building Regulations.

Door types include...

Bi-fold doors

Corner Bi-fold doors

French doors

Single doors

Mid-rail

The Internal Door Collection

Reinvent your home and office...

The OI-30 is a steel-look glazed wall and door system that has been designed to separate out home and office footprints into practical spaces. Whether it's shutting out noise, cooking aromas, or perhaps keeping the dog contained after a muddy walk, the OI-30 will add an abundance of character and class to any interior.

Configuration options...

Choose the right option for you, from Single Doors, French Doors and Fixed Screens, you'll also have the option of combining these and a corner post to create a whole new space.

Coveted style and design...

For a more traditional look, incorporate glazing bars in a grid style, or select fewer bars and more glazing for a modern feel.

Beading options...

The doors look fabulous with their square beading detail, or a chamfered bead is also available to those wishing to emulate a more traditional putty line.

Blackout panels and kickplates...

Fully opaque blackout panels are an option, which are ideal for minimising fingerprints and scratches from children or pets. Alternatively, kickplates are available. These make life easier when nudging the bottom of the door open with your foot if your hands are fully loaded.

Handled with style...

It's really not an exaggeration to say that a door is defined by its hardware, and the Origin Internal Door handle collections have been prepared with that in mind. With multiple ranges available, our handles come in a variety of colour options and offer suited hinges to match.

Signature Knurled Handle - Antique Brass

Contemporary Handle - Matt Black

Heritage Classic Handle - Matt Black

Heritage Edged Handle - Hammered Pewter

Standard Handle - Matt Black

Lock and keep...

Our doors are available with either just a handle, which will operate the latch, or with a thumbturn and release that operates the lock. The locking option is ideal for bathroom doors or home office environments in which peace of mind from interruption is needed while working or making important calls.

The Entrance Door Collection

Panel choices...

Our Entrance Door Collection consists of ten panel options that are spread across two ranges, as well as a plain panel option.

Containing a mixture of traditional and modern styles, the Kensington Range has a collection of panel options that will complement any property type.

If you're looking for something slightly different, then the Sandringham Range has a selection of panels that combine a modern design with geometric shapes, which will add true character to any property type.

Hardware options...

Helping further broaden your design possibilities, we offer an elegant range of premium quality hardware options. From lever and bar handles, through to door pulls, door knockers, spy holes and letterboxes, the exclusive suite is guaranteed to complement any door.

Garage door option...

For the ultimate front of house unity, the Origin Entrance Door can also be specified as a garage door. This creates a harmonious look between products and a cohesive front of house style.

Security...

The Origin Entrance Door has been designed with heightened security at the forefront. Not only does the range pass the PAS 24 requirement, but it can also achieve the rigorous police preferred Secured by Design accreditation.

The Sliding Door Collection

Available in 2 high quality systems...

The Artisan Slider

A structurally bonded system made from premium grade aluminium, the Artisan Slider has ultra-slim sightlines of just 20mm. Its innate strength allows it to accommodate impressively large glass panels, making it both visually stunning and practically versatile.

The Patio Slider

With three sightline options on offer (29mm, 44mm and 77mm), the Origin Patio Slider is perfect for injecting a sense of effortless elegance into the home without compromising on security or performance. Choose from one of the slimmest sightlines in the UK (OS-29), a slightly more traditional style (OS-77), or opt for the best of both worlds with the OS-44.

Yours in as little as 24-hours...

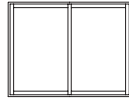

The Patio Slider is available in as little as 24-hours in our most popular colours, whilst the Artisan Slider is available in as little as 4-weeks.

Wide range of sizes and configurations...

Our Sliding Doors are available in everything from a two-door through to a six-door configuration. These can be all sliding or a combination of fixed and sliding doors. All in all, a Sliding Door from Origin can fit into apertures ranging from 1.1m all the way through to 13.2m.

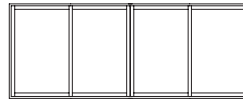

Configurations include...

2 door

3 door

4 door

6 door

The Window Collection

Available in Two Elegant Styles: Soho & Contemporary

Beautiful, minimalist, and designed to maximise light, the Slimline Window (OW-70) is perfect for spaces that demand brightness without compromising strength. With an ultra-slim 65mm frame, it offers sleek aesthetics while maintaining impressive durability, ensuring it withstands even the harshest conditions.

For a modern take on traditional 19th-century timber windows, the Premium Window (OW-80) delivers both style and performance. Its exquisite internal and external flush casement design, paired with unrivaled thermal efficiency, makes it a highly functional and durable choice.

Now available in two stunning aesthetics – Soho and Contemporary...The Origin Window Collection caters to every design preference.

- The Soho Window (available on OW-70) brings a refined steel-inspired aesthetic to your home. Its external flush casement and slim sightlines frame every view with industrial

elegance. Carefully crafted detailing and square beading create an authentic, sophisticated appearance.

- The Contemporary Window (available on both OW-70 and OW-80) offers a sleek, modern look, designed for those who appreciate clean lines and minimalist beauty.

Whichever style you choose, Origin Windows provide lasting quality, strength, and timeless design.

Aerogel...

The world's best insulator, Aerogel – used to insulate space shuttles – can be upgraded to on the OW-80 to help boost the window's thermal efficiency, allowing it to achieve an Energy Rating of B or better.

Thermally efficient...

Despite the ultra-slim profile, every Origin Window has a polyamide thermal break and a bespoke cavity gasket, which limits airflow through the system and improves thermal efficiency.

With advanced triple weather seals, the OW-70 and OW-80 can achieve low U-Value ratings of 1.2 and 0.8 respectively

Available in a wide range of configurations...

Because everything we do is bespoke, we can manufacture your window in a configuration that works for your home. This can include a combination of different openers, fixed frames and gable shapes.

Thanks to our expert manufacturing techniques, you can be assured of the best view of the world outside your window whilst being safe and secure inside.

Colours that stand out...

Windows can be specified in over 150 different colours, as well as two woodgrain options*. These offer a traditional timber look and finish. Not only are these easier to maintain when compared against timber, but are also more durable.

**Only available on the OW-80.*

Case Study

Instagram Home Complete with Bespoke Origin Products...

After living in the area for a couple of years, Abi and her family wanted to purchase somewhere local but a little bit more remote. In 2018, they found the perfect home and purchased it; the home was bought as a project. The family lived in a static caravan in the driveway whilst they totally gutted and renovated the entire house and garden. Six long months later, the project was completed in March 2019 and the family could move in and enjoy their home.

Why Origin?

When carrying out the project, Abi knew that she wanted high quality aluminium doors and windows, and Origin was then recommended to her as being a reputable, industry-leading company with great products. After taking some time to look at the Origin website and brochures, Abi contacted her local Origin installer and started the process.

The colour choice...

Wanting to choose something a little different, Abi chose RAL colour 7030M 'Balmoral Grey' after being shown a sample by her installer. The family didn't want a colour that would date over time, so after some research, they decided that a neutral and pale colour would be best for their home.

Product choice...

Abi was especially thrilled with her Origin Front Door and its unique style. She chose the CO 02 Panel (which has now been discontinued) in RAL colour 7030M to match the other products within the home. Family and friends were also quick to comment on the stunning colour and flush profile which gives a wonderfully neat finish.

As well as the Front Door, the property contains OB-72 Single Doors, 3 sets of 2 Door OB-72 Bi-folds, a stunning 5 Door set of OB-72 Bi-folds, a Gable Window, and an array of OW-80 Windows with glazing bars. These products fill the home with natural light without compromising on security – something that was very important for Abi and her family.

The family are extremely happy with the finished project and love how easy all the doors and windows are to use. Abi is keen to recommend Origin to all her friends and family, claiming that the quality of the product is excellent along with the bespoke nature.

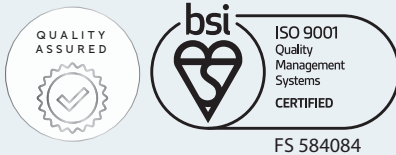

“We wanted quality aluminium doors and windows, and that’s just what we got thanks to Origin!”

Our accreditations...

ISO 9001 - Quality Management

ISO 9001 is an international standard that assesses a company's quality management system. Having first achieved it in 2013, the fact that we are still certified means that we have a track record of consistently providing products and services that meet both customer and regulatory requirements.

ISO 45001 - Health & Safety Management

ISO 45001 recognises our commitment to employee safety and reduction in workplace risks to create a better, safer working condition.

We have spent time reviewing all the activities that go on within the offices,

manufacturing centres and warehouses, and have created a full risk log which link up to our current risk assessments. These are fed back so they can be actioned to be rectified or developed into an improved method of operating.

ISO 14001 - Environmental Management

Now more than ever, we need to be aware of the impact our operations may have on our environment, the legal obligations we must adhere to, and ensuring we are doing things the right way.

We want our customers to buy from us with a clear conscience and feel that ISO 14001 proves that Origin is taking responsibility, acting ethically, legally

and exercising best practice in all that we do.

BES 6001 - Responsible Sourcing in Construction

The three pillars of BES 6001 are social, environmental, and economic sustainability.

The BES 6001 certification demonstrates our commitment to sustainability and provides reassurance to customers and stakeholders. In addition to promoting transparency, this standard drives continuous improvement, which is at the core of our practices.

Secured by Design

Secured by Design (SBD) is a national, police-backed standard, associated with security and levels of performance for weather, operation and quality on domestic properties. It recognises that our doors and windows have not only been tested to the required security standards, but that they also adhere to the rigorous test standards required by the police.

PAS 24

This is your guarantee that the door sets and windows that we manufacture deliver the right level of security for the buildings they are intended to be part of. Like most British Standards, PAS 24

is a minimum standard, and it is either a pass or fail test.

There isn't a performance scale for those that are more or less secure, so some of the products that pass will be stronger than the minimum requirement. That's why we have become Secured by Design accredited.

Qualicoat

Qualicoat is a globally recognised accreditation for powdercoating. It certifies that our dedicated state-of-the-art facility meets and exceeds required levels, highlighting that our operations are ethical, and that we have a proven track record of delivering products that are of a consistently high standard.

Qualicoat covers key aspects such as corrosion and scratch resistance, coastal environment durability, and temperature tolerance. This ensures that the finish on our products is not only visually appealing, but is robust to handle the challenges of everyday use.

Our commitment to quality and innovation is reflected in our:

- Performance standards – providing lasting protection against weather, corrosion, and wear
- Finishing excellence – ensuring colour consistency, paint retention, and longevity

Qualicoat is more than a standard – it's a promise that the finish on every product we deliver meets the highest level of quality.

Our installation teams are fully trained, experienced craftsmen who will complete your home improvement to exacting standards using premium quality products from the Origin home collection. We fully employ all of our installation teams, we do not sub contract any work, we ensure that all employees are passionate about the company's mission "To enrich the lives of our customers through a passion for their homes... by providing the highest level of excellence throughout their journey.
